Carrier-grade ProSBC software and managed services including installation and configuration

aws

intel

vmware®

openstack.

TelcoBridges

A fully managed hosted Session Border Controller for service providers

ProSBC as a service includes a product license subscription with a bundle of professional service hours to instantiate, configure, integrate, test and monitor the client's SBC. The service is billed monthly with incentives for long duration contracts.

ProSBC as a Service Benefits

Fast deployment

High reliability

Less time training

24x7 monitoring

Expert configuration

Bring Your Own Cloud

ProSBC as a Service - from the developers of the prize-winning ProSBC virtual Session Border Controller

With millions of sessions sold and installed worldwide, ProSBC is one of the most widely used – and affordable – virtual session border controllers in the TSP industry.

Ideal Use Cases

STIR/SHAKEN	Integration with STIR/SHAKEN authentication and verification services
Call Routing	Intelligent call routing for carrier peering and SIP Trunking access
Robocall Mitigation	Blocking illegal/nuisance callers
SIP Interoperability	Resolving protocol compatibility issues between service providers
DDoS Protection	Blocking illicit call attempts designed to overwhelm service provider networks
